**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1, 3-7, and 14-19 allowed.

The following is an examiner's statement of reasons for allowance: Even though the prior art references do teach some of the claimed invention, they do not sufficiently teach or suggest the combination of features in claim 1 including the brush arm having an engagement hole and brush arm brush contact portions located at laterally opposite edges of the engagement hole, the holder having an engagement hole and holder brush contact portions being formed on the holder along opposite edges where one edge of the holder is opposite the other edge in the longitudinal direction, and the brush arm brush contact portions extending through the engagement hole of the holder.

Claim 3 is dependent upon claim 1.

For claim 4, the references do not sufficiently teach the combination of features including the brush arm including first and second brush contact portions located at opposite edges of the engagement hole and extending in a longitudinal direction, the holder having third and fourth brush contact portions being opposite each other in a longitudinal direction, and the first and second brush contact portions extending through the brush receiving hole of the holder.

Claims 5, 14-16, and 18 are dependent upon claim 4.

For claim 6, the references do not sufficiently teach the combination of features including the first brush mounting element having first and second brush contact portions, the second brush mounting element having third and fourth brush contact

portions which define a longitudinal length of the brush receiving hole, the first and second brush contact portions having a length corresponding to the longitudinal length of the brush receiving hole, and the first and second brush contact portions extend through the brush receiving hole.

Claims 7, 17, and 19 are dependent upon claim 6.

After a supplemental search of the prior art, it is determined that these features of the applicant's invention is a non-obvious improvement and is therefore patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
